

Safety Data Sheet

according to WHS Regulations

Date of issue: 14.04.2025

Version number 1.0

Revision: 14.04.2025

SECTION 1: Identification

Other means of identification

Trade name: Reserva Module**Article number:** 4,240,374

Relevant identified uses of the substance or mixture and uses advised against

Application of the substance / the mixture DC home storage for PV systems

Details of the supplier of the safety data sheet

Manufacturer/Supplier:**Fronius International GmbH**

Fronius Straße 5

A-4642 Sattledt

T: +43 7242 241 0

Further information obtainable from: pv-support@fronius.com**Emergency telephone number:**

+43 7242 241 0

Available:

Mo - Th: 08:00 - 16:00 h (CET)

Fr: 08:00 - 12:00 h (CET)

Contact your national emergency call centre!

SECTION 2: Hazard(s) Identification

Classification of the substance or mixture

The product is not classified, according to the Globally Harmonised System (GHS).

Additional information:

The product itself is declared as an article in sense of REACH (EC) No. 1907/2006 and is not subject to the provisions of classification in sense of the regulation (EC) No. 1272/2008.

Label elements**GHS label elements** void**Hazard pictograms** void**Signal word** void**Hazard statements** void**Additional information:**

The product itself is declared as an article in sense of REACH (EC) No. 1907/2006 and is not subject to the provisions of labeling in sense of the regulation (EC) No. 1272/2008.

Other hazards

Lithium-ion batteries are gas-tight and harmless if the manufacturer's instructions are observed during use and handling.

Never use chargers that are not suitable for the type of battery with rechargeable batteries. The limits for maximum current load, charging and discharging voltage must be strictly adhered to! Do not short-circuit. Do not damage mechanically (pierce, deform, disassemble, etc.). Do not heat or burn above the permissible temperature. Keep batteries away from small children. Always store batteries in a dry and cool place.

(Contd. on page 2)

Safety Data Sheet

according to WHS Regulations

Date of issue: 14.04.2025

Version number 1.0

Revision: 14.04.2025

Trade name: Reserva Module

(Contd. of page 1)

Lithium-ion batteries are safe to use when used properly and within the parameters specified by the manufacturer. Incorrect handling or circumstances resulting in improper operation may result in leakage of battery contents and decomposition products, resulting in severe reactions hazardous to health and the environment. In principle, contact with leaked battery components can pose a risk to health and the environment. Sufficient body and respiratory protection is therefore required in contact with conspicuous batteries (leakage of contents, deformation, discoloration, dents, etc.). Lithium-ion batteries can react very violently in combination with fire, for example. Battery components with considerable energy can be emitted.

As with other batteries, lithium batteries can continue to be a source of danger even when they are supposedly discharged.

Results of PBT and vPvB assessment

PBT: Not applicable.

vPvB: Not applicable.

SECTION 3: Composition and Information on Ingredients

Mixtures

Description:

Rechargeable lithium-ion batteries are articles from which no substance is released when used properly.

Nominal voltage = 102.4 V

Nominal power = 3159.04 Wh

Nominal capacity = 30.85 Ah

Weight per module = 35.5 kg

Dangerous components:

CAS: 15365-14-7	Lithium iron phosphate	15 - 40%
CAS: 105-37-3	ethyl propionate	15 - 40%
	Flammable liquids – Category 2, H225 Skin corrosion/irritation – Category 2, H315; Specific target organ toxicity (single exposure) – Category 3, H335	
CAS: 7440-50-8	copper foil	10 - 30%
CAS: 7429-90-5	aluminium foil	10 - 30%
CAS: 7782-42-5	Graphite	7 - 25%
CAS: 9011-17-0	Fluoropolymer (VDF/HFP)	3 - 15%
CAS: 96-49-1	ethylene carbonate	0 - 15%
	Specific target organ toxicity (repeated exposure) – Category 2, H373 Acute toxicity - oral – Category 4, H302; Eye damage/irritation – Category 2A, H319	
CAS: 108-32-7	propylene carbonate	0 - 15%
	Eye damage/irritation – Category 2A, H319	
CAS: 21324-40-3	Lithium hexafluorophosphate(1-)	0 - 15%
	Specific target organ toxicity (repeated exposure) – Category 1, H372 Skin corrosion/irritation – Category 1A, H314	
CAS: 9002-88-4	Polyethylene	0 - 5%

(Contd. on page 3)

Safety Data Sheet

according to WHS Regulations

Date of issue: 14.04.2025

Version number 1.0

Revision: 14.04.2025

Trade name: Reserva Module

(Contd. of page 2)

Additional information: For the wording of the listed hazard phrases refer to section 16.

SECTION 4: First Aid Measures

Description of first aid measures

General information:

In normal cases no specific measures needed.

It always applies:

In case of discomfort or doubt, seek medical advice.

If unconscious, use a stable lateral position and do not administer anything through mouth.

The following measures apply to contact with the contents of a damaged battery:

After inhalation:

Supply fresh air; consult doctor in case of complaints.

In case of unconsciousness place patient stably in side position for transportation.

After skin contact:

Immediately wash with water and soap and rinse thoroughly.

Take off contaminated clothing and wash it before reuse.

Seek medical treatment in case of complaints.

After eye contact:

Rinse opened eye for several minutes under running water.

Remove contact lenses, if present and easy to do. Continue rinsing.

Consult an ophthalmologist or eye clinic immediately.

After swallowing:

Rinse mouth thoroughly with cold water. Do not induce vomiting. If the patient is fully conscious, give one or two glass of water to drink. Get medical attention immediately.

Most important symptoms and effects, both acute and delayed

No further relevant information available.

Indication of any immediate medical attention and special treatment needed

Depending on the condition of the patients, the doctor must assess the symptoms and the overall general condition.

SECTION 5: Fire Fighting Measures

Extinguishing media

Suitable extinguishing agents:

CO₂, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.

For safety reasons unsuitable extinguishing agents: Water with full jet

Special hazards arising from the substance or mixture

Batteries may burst at high temperatures, which may result in flammable, toxic and/or corrosive vapours.

May form hydrofluoric acid if the electrolyte comes into contact with water.

In case of fire, the following can be released:

CO_x

Hydrogen fluoride (HF)

Lithium oxides

(Contd. on page 4)

Safety Data Sheet

according to WHS Regulations

Date of issue: 14.04.2025

Version number 1.0

Revision: 14.04.2025

Trade name: Reserva Module

(Contd. of page 3)

Advice for firefighters**Protective equipment:**

Wear self-contained respiratory protective device.

Wear fully protective suit.

Additional information

Switch off the power supply.

Remove container from fire, if possible without risk.

Cool endangered receptacles with water spray.

Ensure good ventilation.

SECTION 6: Accidental Release Measures**Personal precautions, protective equipment and emergency procedures**

Restricted access to the affected area until cleaning work is completed.

Wear protective equipment. Keep unprotected persons away.

Ensure adequate ventilation

Avoid skin and eye contact with damaged batteries.

Do not breathe dust/fume/gas/mist/vapours/spray.

Environmental precautions: Do not allow to enter sewers/ surface or ground water.**Methods and material for containment and cleaning up:**

If the battery is damaged:

Cover leaked material with inert absorbent material (sand or soil) and dispose of in suitable containers.

Clean again.

Ensure adequate ventilation.

If the battery pack is in water, there is a risk of a weak electric shock. When the water is electrolysed, hydrogen is produced. Good ventilation must be ensured to prevent the concentration of hydrogen and an explosion of the hydrogen in the enclosed space as a result. If possible, remove the battery or battery pack from the water and inform the local police.

Reference to other sections

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

SECTION 7: Handling and Storage**Precautions for safe handling**

In any case, the warnings on batteries and the instructions for use of devices and other applications must be carefully observed.

Use only the recommended battery types.

Lithium-ion batteries should preferably be stored at room temperature and dry (max. 40°C), large temperature fluctuations should be avoided. (e.g. do not store near heaters, do not permanently expose to sunlight).

Never open, mechanically damage or burn the battery!

One of the most important risks when transporting batteries and battery-powered equipment is the short circuit of the battery caused by the contact of the two poles of the battery with other batteries, metal objects or other electrical conductors. Therefore, the packaged battery (cells) and batteries must be adequately separated to prevent short circuits and electrode damage.

(Contd. on page 5)

Safety Data Sheet

according to WHS Regulations

Version number 1.0

Revision: 14.04.2025

Trade name: Reserva Module

(Contd. of page 4)

Do not allow broken battery cells to come into contact with water. When handling battery packs of over 50 V, the operating personnel require appropriate insulation protection.

Observe protective measures and safety instructions.

Information about fire - and explosion protection:

Keep away from heat/sparks/open flames/hot surfaces. No smoking.

Conditions for safe storage, including any incompatibilities**Storage:****Requirements to be met by storerooms and receptacles:**

Store in dry conditions.

Store in a cool location.

Protect from heat and direct sunlight.

Store in accordance with local/regional/national/international regulations.

Information about storage in one common storage facility:

Store away from oxidising agents.

Do not store together with acids.

Further information about storage conditions: Store in original container.

Recommended storage temperature:

room temperature

Longer storage with a load capacity between 25 and 75 %.

Storage class: 11

Specific end use(s) No further relevant information available.

SECTION 8: Exposure controls and personal protection

Control parameters

Lithium-ion batteries are products from which no substances are released under normal and reasonably foreseeable conditions of use.

Exposure controls**Appropriate engineering controls**

No further data; see section 7.

Technical measures and the use of suitable working methods take priority over the use of personal protective equipment.

Individual protection measures, such as personal protective equipment**General protective and hygienic measures:**

The usual precautionary measures are to be adhered to when handling chemicals.

Keep away from foodstuffs, beverages and feed.

Do not eat or drink while working.

Avoid skin and eye contact with damaged batteries.

Avoid inhalation of spilled material.

Take off contaminated clothing and wash it before reuse.

Protective clothing needs to be selected specifically for the workplace, depending on concentrations and quantities of the hazardous substances handled. The chemical resistance of the protective equipment should be enquired at the respective supplier.

Eye wash bottles and emergency showers should be provided in the immediate area near the workplace.

Respiratory protection: Not required when handling undamaged batteries.**Hand protection**

Not required when handling undamaged batteries.

Wear protective gloves made of chloroprene or rubber if batteries are damaged.

Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation.

Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

Eye/face protection

Not required when handling undamaged batteries.

Wear protective goggles if batteries are damaged.

Body protection: Not required when handling undamaged batteries.**Environmental exposure controls** Do not allow to enter sewers/ surface or ground water.**SECTION 9: Physical and Chemical Properties****Information on basic physical and chemical properties****General Information****Physical state**

SECTION 10: Stability and Reactivity**Reactivity** No hazardous reactions known if stored and used as prescribed.**Chemical stability** No decomposition if used and stored according to specifications.**Possibility of hazardous reactions** No further relevant information available.**Conditions to avoid**

Keep away from heat/sparks/open flames/hot surfaces. No smoking.

Do not expose the rechargeable Li-Ion battery to mechanical shock.

Do not disassemble, crush, short-circuit, or connect with incorrect polarity. Avoid mechanical or electrical abuse.

Do not allow to come into contact with water or acidic substances.

Incompatible materials:

If the battery leaks or is damaged, avoid contact with strong oxidising agents, mineral acids, strong alkalis and halogenated hydrocarbons.

Hazardous decomposition products:

No decomposition if used and stored according to specifications.

With open cells there is the possibility of the release of hydrofluoric acid and carbon monoxide.

Irritating or toxic gases.

Peroxides

SECTION 11: Toxicological Information**Information on hazard classes as defined in Regulation (EC) No 1272/2008****Inhalation:** No probable route of exposure of the product itself. Inhalation of substances leaked from damaged batteries may irritate the respiratory tract and damage organs during prolonged or repeated exposure.**Skin contact:** Contact with the undamaged battery does not present a hazard. Skin contact with damaged batteries may cause burns.**Eye contact:** Contact with the undamaged battery does not constitute a hazard. Eye contact with spills from the damaged battery may cause burns.**Ingestion:** No probable route of exposure of the product itself. Ingestion of spills may cause burns to the esophagus and stomach. Harmful if swallowed.

The product is declared as an article and is not subject to the CLP classification and labelling requirements.

Acute toxicity Based on available data, the classification criteria are not met.
